Remarks/Arguments:

The applicant would like to thank the examiner for the telephonic interview on

May 6, 2008, in which the Windows Explorer reference was discussed with respect to

the claims.

The above Amendments and these Remarks are in reply to the Office Action

mailed March 12, 2008.

Claims 1-22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable

over Ng, et al. (US Patent 6,285,366) in view of Brassard et al. (US Patent 6,769,095)

and Microsoft Windows ("Windows Explorer") copyright ©1981-2001.

Claims 1, 7, 11, 17 and 24 were previously amended to add the feature that "the

context sensitive editor is different for different selected nodes and wherein when a top

portal node is selected, the context sensitive editor allows for the creation of a new

portal, the new portal being associated with a new node in the hierarchy below the top

portal node and wherein when a specific portal node below the top portal node is

selected, the context sensitive editor allows for inputting field data concerning the

specific portal". The examiner cited the Windows Explorer reference for this limitation

and indicated a folder could be considered a portal.

The applicant now amends claims 1, 7, 11, 17 and 24 to add the feature that "the

portals are used to aggregate website content for access using the Internet". For this

reason, the prior art references are not believed to show or make obvious the present

invention.

In light of the above, it is respectfully submitted that all of the claims now

pending in the subject patent application should be allowable, and a Notice of

Allowance is requested. The Examiner is respectfully requested to telephone the

undersigned if he can assist in any way in expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any

overpayment to Deposit Account No. 06-1325 for any matter in connection with this

response, including any fee for extension of time, which may be required.

Respectfully submitted,
